

# Settle X

Settle X is a suite of products that allow some of the most important On-demand companies, Wallets, and Digital Asset Exchanges around the world to work with the most cost-efficient and commonly utilized domestic payment rails.

## What is it for?

Settle X enables compliant interoperability between local currency and digital assets through a suite of products.

- xRamp
- xPayments
- xRelay
- xPanel

## xRamp

User on-ramp for companies that require compliant, scalable and immediate pay-in and pay-out interoperability.

**Accept payments, borderless**

xRamp allows the largest crypto exchanges to operate with Fiat currencies without the need for local companies and infrastructure.

**KYC and Compliance embedded**

xRamp already includes the customer identification, screening, and transaction monitoring capabilities needed to operate compliant payment operations.

**Immediate settlement of digital assets and liquidity**

By running xRamp with xRelay, a fiat to crypto operation with real time settlements becomes seamless.

**Access to Our Financial Infrastructure**

No need to incorporate companies and establish local currency accounts, we have that covered.

## Simple, beautiful user experience

Our front-end module is easy to drop into whatever you're building and designed to optimize conversion.

## xRelay

XRelay allows the immediate, real-time settlement of payments processed around the globe, by leveraging the speed and liquidity of price-stable digital assets with local currencies.

**Immediate settlement**

Allows SettleX products to immediately settle positions from payment processing and disbursement operations internationally in seconds, not weeks. Works with digital assets and local currencies.

**Fast and cost effective**

By leveraging the power of stable digital assets, also known as "stablecoins", xRelay sends the balance of each payment processed to your corporate wallet in seconds, avoiding costly and slow SWIFT transfers.

## xPayments

Process disbursements and payouts to your distributed workforces in real time with minimal cost, and without the need of local compliance, support or operations.

- + Crowdsourced economies
- + Cross-border billing
- + Marketplaces
- + Remote workers
- + Freelancers

## xPanel

With xPanel you have full back office control of Settle X product suite. Multi role dashboard for user accounts, balances, deposit and withdraw tickets, FX rates, user KYCs, limit enforcements, and more.

## Seamless API integration

A well documented API

- # xRamp
- # xRelay
- # xPayments
- # xPanel

```
<form id="link-form-id" method="GET"> </form>
<script
src="https://cdn.plaid.com/link/v2/stable/link-initialize.js"
data-client-name="Your Company's Name"
data-form-id="link-form-id"
data-key="test_key"
data-product="transactions"
data-env="sandbox">
</script>
```

## Use case: Binance

Binance, the largest digital asset exchange network, launched a new partnership with Settle Network, using their new product, xRamp, to be able to operate with domestic fiat currencies.

## Ready to get started?

Our network is already connected to the top fintech companies, banks, cash networks and mobile apps. Join us and become a virtuous partner of the Settle Network.
